Capability Statement

Digital Lotus Development, LLC

Accessible websites, WordPress, and web applications for public agencies

UEI **KXJ5ZDATBPF3**
CAGE **26WZ7**
NAICS **541511**

Updated November 2026. Also online at digitallotusdev.com/capability-statement.

Company overview

A woman-owned Kansas City firm designing, building, and maintaining accessible websites and web applications since 2016 for public agencies, health nonprofits, businesses, and marketing agencies. All work is led and performed by the owner, whose earlier roles include healthcare systems, state insurance licensing, and cybersecurity.

Core competencies

- **Accessibility to Section 508 and WCAG 2.0, 2.1, and 2.2 AA:** automated (axe-core), keyboard, and screen-reader audits; remediation in themes, templates, and content; reports and staff training.
- **WordPress:** custom themes and plugins in PHP, Gutenberg blocks, ACF Pro, WooCommerce, multisite, headless, and Bedrock; technical SEO and analytics.
- **Web applications and portals:** TypeScript, React, Next.js, Node.js, and Python/Django; REST and GraphQL APIs; PostgreSQL and MySQL; role-based access control.
- **Hosting and security operations:** AWS, Azure, Linux, and Docker; migrations, backups, monitoring, patching, hardening, and incident response.
- **Quality and delivery:** Git, CI/CD (GitHub Actions, Bitbucket Pipelines), automated testing (Playwright, Jest, Cypress), staging environments, and code review.
- **Technical leadership and AI:** fractional tech lead for architecture, standards, documentation, and mentoring; AI adoption and governance; LLM features with automated evaluations.

Past performance

Public health, transit and community agency websites

Subcontractor to Grace Advertising & Consulting · monthly retainer, 2016 to present

Development, managed hosting, security, and accessibility remediation for clients including Samuel U. Rodgers Health Center, KC Health Equity, and Altruism Media Inc: custom PHP plugins and templates, access-controlled portals, security hardening, and incident response.

Accessibility audit and remediation

Altruism Media Inc, nonprofit · November 2026

Audited a 45-page WordPress site to WCAG 2.2 AA, which covers 2.1 AA: 31 issues fixed, automated violations cut from 424 to 0, and every live page passing manual keyboard and screen-reader re-tests, with audit, remediation, and accessible-use documentation. *Disclosure: the owner is Altruism's board vice president and technical advisor.*

Fractional technical lead

BeOnTap, WordPress agency · January 2026 to present

Introduced Bedrock and Bitbucket Pipelines across about 20 client sites, adding version control, testing environments, CI/CD, and developer documentation; leads AI adoption and governance, patching policy, and incident response.

Key personnel experience

Gabriela Dombrowski, owner. Prior employment, not contracts performed by Digital Lotus:

- **NIPR, Application Developer, 2021 to 2023:** public-facing React platform for state insurance producer licensing nationwide, with regulated personal data and access controls.
- **Query, Senior Software Engineer, 2023 to 2025:** architecture and design system for a cybersecurity platform, with role-based access to sensitive data.
- **Cerner, Systems Administrator, 2013 to 2016:** Linux for production healthcare systems, including five high-availability clusters serving about 300 clients, and on-call incident response.

Differentiators

- WCAG remediation verified with screen readers, ahead of the ADA Title II (WCAG 2.1 AA) deadlines of April 2027 and 2028.
- Code handed over in version control with documentation, so the agency is never locked in to one vendor.
- Every client since 2016 has returned for repeat work.

Company data

SAM.gov: Active to Oct 25, 2027
Founded: 2016; LLC since 2025
Size: Small under all listed NAICS
Service area: Remote nationwide; on site in MO and KS
